

UROS STANIMIROVIC

SOFTWARE DEVELOPER
JAVASCRIPT/TYPESCRIPT

With accumulated decade of experience in Software Engineering and Product development.
Dedicated, hard-working, and constantly seeking to improve myself. Biggest strengths are problem solving and communication.

MOST RELEVANT EXPERIENCE

2022 - present at IGD Solutions [Fullstack] - Lead

- Working in [Node.js] and [Angular] in a well organized environment on a million plus user in house project.
- Developing and designing features as well as working on and maintaining old code.
- Managing a team of 4 people
- Using best practices and most modern tools to write high quality code.

2020 - 2022 at Blinking [Backend]

- Worked in [Node.js].
- Worked in a dynamic, highly responsible position in a modern environment on an original product, Agile and Scrum organization.
- Worked with both relational [PostgreSQL] and non-relational [MongoDB] databases
- Managing REST API's in a microservice architecture, built with [Express.js] [NEST.js]
- Utilized many third party packages for back-end development (Joi, Jimp, TypeORM...)
- Wrote REST API unit tests using [Jest]
- Worked with [AWS] (SQS, KMS, S3) and many alternatives (Minio, RabbitMQ, Vault etc.)

2021 - Present at Emobile - Part time [Fullstack]

- Developed new features on an existing Open Source project [Node.js] [Angular][MongoDB], worked with OICP, OCPI and OCPP protocol, learned managing big chunks of data efficiently.
- Project is based around charging electrical cars with the integration to the main HQ, Hubject, connecting charging stations all around the world.
- Code was highly professional and well thought out which helped me learn new things and improve a lot

2022 - present at Techtonik - Freelance [Fullstack]

- Building new, and working on existing apps in a organized environment with a team of very talented and experienced engineers in order to further improve my knowledge.
- Technologies used include: [Angular], [Node.js], [Electron], [Hugo] [AWS] [Python]

EDUCATION

Faculty of Organizational Sciences
Information systems and technologies

KNOWLEDGE

- Strong knowledge of Javascript, Node.js, Typescript
- Great SQL and database understanding
- Very solid AWS knowledge, deployed full stack applications alone (EC2, S3, EKS, Route53...)
- REST API microservice architecture practices
- Advanced knowledge of the Linux Ubuntu and Kali distributions
- Experience with Bash Scripting
- Experience with Docker, Kubernetes
- Experience with holding public lectures

AWARDS & ACHIEVEMENTS

2022- Lecturer at S2S - Ethical Hacking

2021 - First place in competition for cyber security

2020 - Third place in competition for cyber security

Participated in a team, representing our Faculty and University in a regional competition in Cyber Security. Underwent extensive training and improved my Cyber security and general knowledge a lot. Had the opportunity to listen to lectures from the best people in this field. Went to Bratislava and Vienna for further lectures and improvement.
